

BRUCE BEDELL

The treatment over a lifetime...

THESE ARE 6 PARTS OF STURGE-WEBER SYNDROME:

- 1) Neurology - (grand ball seizures)
- 2) Neurotology - (thought processing)
- 3) Glaucoma - (blood-shot eye)
- 4) Nephrology - (strength, emotion)
- 5) Dermatology - (birthmark)
- 6) Klippel-Trenaunay - (face, leg, lost of teeth)

AND 3 LIFETIME BODY CHANGES:

- 1) Infancy (newborn to 3 years old)
- 2) Adolescence (14 - 17 years old)
- 3) Elderly (65 - 70 years old)

Emotional challenges

- Be part of a large family, brothers & sisters must live with you.
- They must share their desires along with their siblings.
- There are no people, no closer who care about each other.
- **There's someone for everyone.** (Been married for over 52 years)
- Emotional stability for strength, farm life, farm animals don't care what you look like.
- Suntan (less skin color contrast)
- Draw me a picture. **Not able to understand what you read**, therefor not able to and study well, low grades in school.
- Geometry and drafting are my subjects.

A major time in my life was in the mid 1960s. The assignation of the President and Martin Luther King. This is when our society was forced to accept those of us with abnormalities, and were constitutionally forced to be equally accepted.

Doctors need to know more about SWF. I put together a summary of the 6 abnormalities that I give to each doctor. Each one must consider all the abnormalities to best care for me.

Thank you,

Bruce

SECURE DONATION

Sturge - Weber Syndrome

Neurologist

Carlín-Lina Davis Sim 12670 Whitehill Drive Ft. Myers FL 33907

Dilatant (phenytoin) 2 (200 mg) +30 mg 1 daily

8/24 1:45 <http://www.fmgmd.com/>

Neurology

Oxygen / blood level in brain

Epilepsy – Electric brain surge

Seizure levels

- Passing out (falling asleep)
- Petty maul
- Grand maul

Medication: Dilantin

A period of automatic behavior may be interpreted as being drunk

Solution: Don't operate motorized vehicle / walk on a public roadway

Don't operate a handicapped self-propelled tricycle.

Seizures can be caused by

- heat exhaustion =
- drinking overdose

Otolaryngology Thought Processing

Barrow 24 N Del Prado 772 2171 Cape Coral FL 33909

Vicki 936 1616

10:14-8:00 AM- 7:21-8:20 1/7 11:00 7/6-8:00 7/23 8:30

Neurotology

The harboring of blood vessels in brain

Not able to grasp information instantly.

- Reading difficult to grasp
- Draw me a picture (Graphics, Mapping)

Reading difficult

2/2020 MRI, 3/15/2022, cat scan 2/15/22

Recent changes in Mental satisfaction

due to move to FL

- 90 degrees & 90 % humidity
- Elevation of 8' vs 800' above seas level
- Barometric pressure 1013 mb

Ophthalmologist

Liebesman Quigley 11.7 Dal Prado N

PWB

Dermatology

The harboring of blood vessels

Vascular malformation (Deep purple) Port wine

hemangioma (Birthmark)

Secretion of excessive blood

Solution: Don't give blood.

Pathophysiology of electric injury is altered during pregnancy; assessment of fetal well-being should be prompted no matter how trivial an incident may appear

Klippel-Tracannay Syndrome

Vascular abnormally- Enlarged body areas

(larger right face size) Solution: None

Ulcerating body parts - Large cysts on face,

varicose vines on lower leg.

Solution: Surgically remove cysts

Internal cysts (large intestines)

Result: ♥ Rupturing urinal passage

♥ Varicose veins ♥ Walking awkwardly

swollen right lower leg and foot.

Don't stand in line

Jaws don't fit together * biting lips.

♥ Don't eat potato chips, beef steaks, peanuts.
